# Building a Rockies trip-planning website

**Business websites · Tourism · own portfolio project**

## THE CHALLENGE

Visitors needed a way to turn ideas for Banff, Canmore and Lake Louise into practical day plans.

## THE WORK

We built BanffBound as an Astro website with destination and trail guides, searchable content, an editable trip planner, and routes to third-party booking providers.

## LIVE DELIVERY EXAMPLE

**7**
Itinerary templates in the trip planner

**6**
Destination guides in the town directory

## HOW TO READ THE FIGURES

BanffBound is a first-party portfolio project. Counts describe the website’s published capabilities. Booking-provider clicks and completed reservations are separate measures.
